

Data Dictionary: Bureaucratic Autonomy in Environmental Governance

Gus Greenstein

Leiden University

February 2026

Abstract

This document provides a data dictionary for the dataset used in *Bureaucratic Autonomy in Environmental Governance* (Greenstein 2026). The dataset covers 39 national environmental agencies as of 2010, drawn from Jordana et al. (2018) and supplemented with country-level indicators from the World Bank and the Database of Political Institutions. For each variable the dictionary records the column name as it appears in the `data.csv` file, a plain-language label, the variable type, the coding scheme or range of values observed in the sample, and the original data source.

1 Variable Descriptions

Column name	Label	Type	Values	Source
country	Country name	String	39 unique country names spanning six continents	Jordana et al. (2018)
autonomy	Composite autonomy index	Continuous	Simple average of the 12 binary autonomy dimensions listed below. Range: 0.33–0.83	Author, from Jordana et al. (2018)
agency_head_prof_req	Agency head professional requirement	Binary	1 = appointment of the agency head is dependent upon a particular professional requirement; 0 = no such requirement	Jordana et al. (2018)

Column name	Label	Type	Values	Source
agency_board_prof_req	Agency board professional requirement	Binary	1 = appointment of agency board members is dependent upon a particular professional requirement; 0 = no such requirement	Jordana et al. (2018)
cap_implement_sanctions	Capacity to implement sanctions	Binary	1 = agency has the capacity to impose sanctions; 0 = no such capacity	Jordana et al. (2018)
cap_supervise	Capacity to supervise	Binary	1 = agency has the capacity to supervise (control, inspection, surveillance); 0 = no such capacity	Jordana et al. (2018)
cap_research	Capacity to do research	Binary	1 = agency has the capacity to conduct research; 0 = no such capacity	Jordana et al. (2018)
cap_elaborate_norms	Capacity to elaborate norms	Binary	1 = agency has the capacity to elaborate its own regulations and norms; 0 = no such capacity	Jordana et al. (2018)
cap_conflict_resolution	Capacity to promote conflict resolution	Binary	1 = agency has conflict resolution capabilities; 0 = no such capacity	Jordana et al. (2018)

Column name	Label	Type	Values	Source
cap_establish_prices	Capacity to establish prices	Binary	1 = agency has the capacity to establish tariffs and prices in the sector; 0 = no such capacity	Jordana et al. (2018)
cap_est_markets	Capacity to establish markets	Binary	1 = agency has the capacity to regulate entry to and exit from the market, including mergers and absorptions; 0 = no such capacity	Jordana et al. (2018)
no_review_minister	Minister does not review	Binary	1 = the minister does not have the power to review agency decisions; 0 = ministerial review exists*	Jordana et al. (2018)
no_review_pres_pm	President/Prime Minister does not review	Binary	1 = the president or prime minister does not have the power to review agency decisions; 0 = such review exists*	Jordana et al. (2018)
no_review_parliament	Parliament does not review	Binary	1 = parliament does not review agency decisions; 0 = parliamentary review exists*	Jordana et al. (2018)

Column name	Label	Type	Values	Source
gdp_pc_2000_2009	GDP per capita, 2000–2009 average	Continuous	Average GDP per capita (USD, constant 2024) over 2000–2009. Range: \$189–\$63,280	World Bank Development Indicators
dominant_system	Dominant political system, 2000–2009	Categorical	Modal political system type during 2000–2009: <i>Presidential</i> ; <i>Parliamentary</i> ; <i>Assembly-Elected</i> <i>President</i>	Database of Political Institutions
corruption_2000_2009	Control of Corruption, 2000–2009 average	Continuous	Average World Bank Control of Corruption indicator over 2000–2009. Higher values = better. Range: –1.44–2.38	World Bank Governance Indicators
reg_quality_2000_2009	Regulatory Quality, 2000–2009 average	Continuous	Average World Bank Regulatory Quality indicator over 2000–2009. Higher values = better. Range: –1.93–1.78	World Bank Governance Indicators
rule_law_2000_2009	Rule of Law, 2000–2009 average	Continuous	Average World Bank Rule of Law indicator over 2000–2009. Higher values = better. Range: –1.76–1.94	World Bank Governance Indicators

Column name	Label	Type	Values	Source
gov_effect_2000_2009	Government Effectiveness, 2000–2009 average	Continuous	Average World Bank Government Effectiveness indicator over 2000–2009. Higher values = better. Range: –1.45–2.16	World Bank Governance Indicators

* Recoded from original so that 1 = more autonomy.
